

**Q: What is Laminine?**

A: Laminine is a combination of Fertilized Avian Egg Extract, Marine Protein from shark cartilage and Phyto Proteins from the pea plant, together known as the OPT9 proprietary blend. Laminine provides the body with the full chain of 22 amino acids essential for cellular health. When in the body, this amino acid chain then acts as a natural "adaptogen," reprogramming adult stem cells to travel and repair areas of the body and mind that are most in need. It is a safe, natural dietary supplement made in the U.S.A. at Food & Drug Administration (FDA) and Current Good Manufacturing Practices (cGMP) approved facilities.

**Q: Does Laminine contain Young Tissue Extract?**

A: Fertilized Avian Egg Extract, otherwise known as Young Tissue Extract, has always been in the formulation of Laminine. As mentioned above, LifePharm's proprietary OPT9 blend contains Marine Protein, Phyto Protein and Young Tissue Extract from Fertilized Avian Eggs. LifePharm has never changed the formula in Laminine and has ALWAYS included Young Tissue Extract in our proprietary OPT9 blend.

**Q: What is the suggested daily usage of Laminine?**

A: The suggested usage for Laminine is one to four capsules daily, taken in the morning and evening before meals.

**Q: Is Laminine safe for animal consumption?**

A: While Laminine was not developed specifically for consumption by animals, we have no reports of Laminine causing any adverse reactions in them. As with human consumption, if you have any specific concerns or questions about your pets taking Laminine, consult with your veterinarian before giving Laminine to them.

**Q: What is the suggested Laminine usage for different animals, such as: cats, dogs, and horses?**

A: The suggested usage varies by animal. The vets we have consulted with who use Laminine in their practices recommend the following:

For dogs and cats (split equally in order to consume twice daily):

0-40 pounds: ½ to 1 capsule daily

40-80 pounds: 2 capsules daily

80-100 pounds: 3 capsules daily

For horses, suggested usage is approximately 4 capsules daily.

For more details, please consult the Laminine and Pets FAQs.

**Q: Are there adverse reactions to any of the ingredients in Laminine?**

A: There are no documented cases or instances of adverse reactions. When used as directed, Laminine is safe and effective, but the effects often vary greatly by individual. Please check with your physician if you are allergic to eggs. As always, if you have any questions about how Laminine may affect you, please check with your physician.

**Q: From where does LifePharm source its Fertilized Avian Egg Extract?**

A: Since early 2012, LifePharm has sourced its Fertilized Avian Egg Extract from cage-free, hormone-free chicken farms in the United States. LifePharm also abides by many of the standards required for organic chickens, including feeding them a vegetarian diet that is free of pesticides and antibiotics.

The Fertilized Avian Egg Extract is then developed with the process of Hygienic Evaporative Cooling. Hygienic Evaporative Cooling keeps the peptide chains that are so important in Laminine intact when converting the Fertilized Avian Egg Extract from a liquid to a powdered form. This technology is exclusive to LifePharm and was not readily available anywhere else in the world besides the United States. Previously, LifePharm sourced its Fertilized Avian Egg Extract from Norway, but the change occurred in order to ensure the quality, traceability and supply of our materials. The laws governing avian products are especially stringent in the U.S.A., and LifePharm prides itself on using facilities that operate under FDA and cGMP guidelines.

**Q: Is the Laminine formula patented?**

A: The patent process requires revealing the proprietary formula of Laminine, so LifePharm has chosen not to pursue a patent in order to keep our unique formula confidential. The proprietary product formula ensures you have a unique product to share and use to grow your business.

**Q: Is Laminine Halal certified?**

A: Yes, Laminine is certified Halal by the Islamic Food and Nutrition Council of America (IFANCA).

**Q: Can Laminine be taken in conjunction with prescription or over-the-counter medication?**

A: Laminine is not intended to diagnose, treat, cure, or prevent any disease or ailment. If you have any questions about how Laminine will be affected by other medications you take, please consult with your physician.

**Q: Does Laminine contain Laminin?**

A: Laminin is an adhesion molecule found in everyone at the cellular level. It is a substance that holds us all together, and therefore part of the inspiration for the name "Laminine." However, Laminine contains no Laminin.

**Q: Why is Laminine only available through Independent Business Owners?**

A: Laminine is not available through infomercials or on store shelves. It has a story to tell and is meant to come into the marketplace through the "Relationship Marketing" model, and that is why we have chosen to offer Laminine exclusively through our network of LifePharm IBOs.
