Laminine Endorsements

"To be successful, you have to be persistent, believe in yourself and love the company and product you are involved in. I have been through seven months of therapy to improve my health, and I believe Laminine assisted in my recovery by allowing me to sleep well and maintain my muscle tone and strength. I am looking forward to getting even more involved with LifePharm Global in the coming months and well into the future."

Laurene B., Australia

"In general, I am a healthy person and was not looking to make significant changes to my physical well-being. Nonetheless, since I started taking Laminine, I have noticed specific benefits. For one, I haven't caught a cold even once. For me, that means my immune system is stronger. I no longer get down and feel better overall."

Svetlana G., U.S.A.

"Two years ago, my 87-year-old mother suffered a fall after running around Mile Square Park in Fountain Valley, California. She broke her hip and elbow. The medical treatment was a new hip ball and screws surgically placed into her arm/elbow. She began taking Laminine at a rate of four per day and within a few months, expelled the screws right out of her skin. To her doctor's surprise, she recovered even faster than children usually do."

Kent H., U.S.A.

"I was both an athlete and a member of the military; but in recent years, the pain in my legs prevented me from sleeping at night. Less than a month after taking Laminine, I experienced great relief and my sleep improved substantially."

Rashid T., U.S.A.

"In 2005, my vision worsened, and I was partially blind, unable to speak and terribly demoralized. Before this incident, I drove over 1,000 miles per week, and I loved it. From that point forward, I could no longer drive. At times, I would almost become desperate because of my inability to get around. However, since I started taking Laminine in November of 2013, my feelings of desperation have dissipated, my attitude has greatly elevated and my ability to earn an income has really helped me. My vision has improved and I'm living on my own, doing my own shopping, cooking and cleaning. I look forward to each day with hope and promise that it will be even better than the last. The staff at LifePharm Global Network is so supportive that it makes it easier for me to help others who desperately need this wonderful product."

Jack B., U.S.A.

"Pete was diagnosed with Myotonic Muscular Dystrophy about 27 years ago. Pete says, 'I can do more things such as walk again; I'm not in a wheelchair now, which is an amazing feeling. With this independence, I've been able to travel to more places, such as Bali. In Bali, I was able to go out every day and sometimes walk a few kilometers. Since coming back from Bali with renewed invigoration and confidence, I started driving again for short trips. It just feels great to have my independence and mobility back'"

Lucie D., Australia
