DID YOU KNOW LAMININE COMBINES  
SCIENCE AND TECHNOLOGY  
WITH ANCIENT TRADITIONS?

*Not for Distribution*

## WHAT IS THE HISTORY OF FERTILIZED AVIAN EGG EXTRACT?

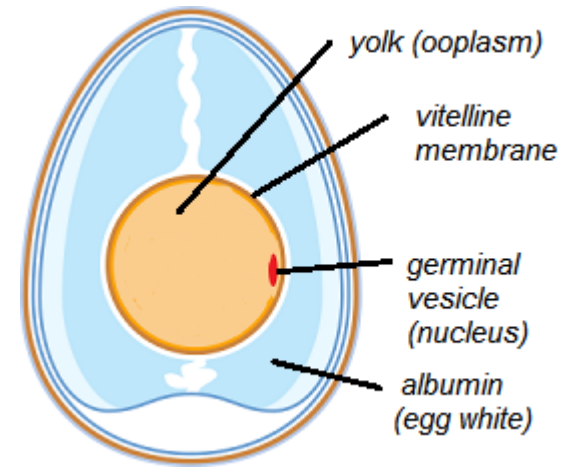

- Fertilized hen egg has been traditionally used in China and other Asian countries for centuries as a supplement for health benefits.
- Physician John Davidson in early 1900s used fertilized avian extract to support the health and well being of his patients.
- 50 years afterwards, Dr. Bjoedne Eskeland began research on fertilized avian egg extract. Dr. Eskeland later teamed up exclusively with LifePharm to formulate Laminine.

## NO OTHER FOOD IS SIMILAR TO FERTILIZED AVIAN EGG:

- As avian egg develops after fertilization, it contains a unique array of proteins, peptides, antioxidants, immune defense factors and growth factors
- Avian egg is the largest “cell” that contains all proteins needed as a source of amino acids for the growth of the developing chick.
- It is a rich source of nutrients that support a variety of biological functions.

# FERTILIZED AVIAN EGG EXTRACT IN LAMININE

- Has been boosted with the full range of additional amino acids
- This means that during its delivery, it can support protein synthesis

## RECENT SCIENTIFIC DISCOVERIES ABOUT NINE-DAY FERTILIZED AVIAN EGG EXTRACT:

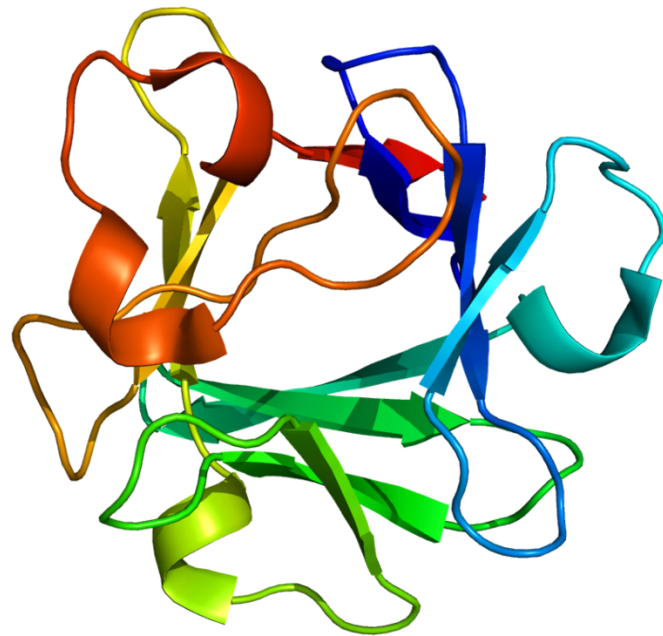

- Scientific challenge in keeping the nine-day FAEE intact during processing
- LifePharm conquered this challenge with the exclusive use of evaporative cooling technique (using no heat)
- This technique keeps the peptides and growth factors intact without denaturing them (denaturing means changing the structure and function)
- This technique maintains the natural structure and integrity of cells

## WHAT IS FIBROBLAST GROWTH FACTOR?

- Functions in the adult human as homeostatic factors that respond to injury
- Functions as regulator of metabolism
- Recent discoveries suggest multiple roles in tissue homeostasis and repair

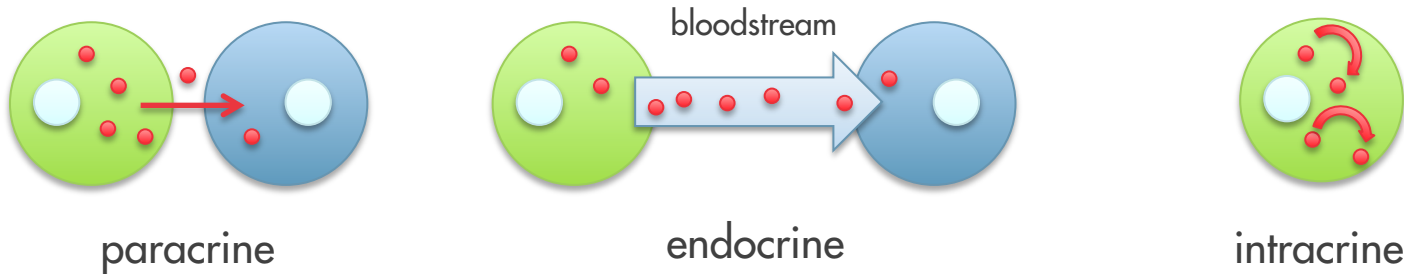

## FIBROBLAST GROWTH FACTOR

### COMMUNICATES (SIGNALS) IN THREE WAYS:

- cell-to-cell communication known as paracrine signaling
- endocrine signaling refers to hormones that travel through the circulatory system
- communication that occurs within the cells known as intracrine signaling

## WHAT DOES FGF SIGNALING DO?

- supports the function of spine, brain, sex organs, nasal passages, inner ear, teeth, mouth, blood vessel tone, heart muscle repair, hair growth, limb and organ, muscle and nerve coordination, bone mineralization and vitamin D utilization
- supports lipid and sugar metabolism, bile acid metabolism and weight management
- supports phosphorous regulation for maintenance of kidney functions

## HOW DOES THE FGF IN LAMININE WORK FOR YOU?

- Laminine supplies FGF in the form of an easily swallowed capsule.
- The FGF in Laminine travels to the areas of the body that are in need of the most repair.
- Consumers of Laminine experience variety of benefits: stress relief, brighter skin, better sleep, recovering more quickly from strenuous activities, clarity of mind, increased emotional balance and more!

## HOW CAN LAMININE WORK EVEN BETTER?

- Laminine OMEGA<sup>+++</sup>, DIGESTIVE<sup>+++</sup> and IMMUNE<sup>+++</sup> help you keep the various systems of the body working as smoothly as possible.
- Because Laminine targets the weaker areas of the body, it can work in tandem with the other products for quicker results.

# DON'T WAIT UNTIL YOUR BODY IS IN DISTRESS.

Keep your body functioning optimally with Laminine, Laminine OMEGA<sup>+++</sup>, DIGESTIVE<sup>+++</sup> and IMMUNE<sup>+++</sup> as part of your daily regimen.
